Lynwood, California 90262

Subject: Phase I Environmental Site Assessment
Two-Acre Vacant Land, Site No. 3
Brownfield Revitalization Project
Lynwood, California

Dear Mr. Hathorn:

In accordance with the contractual agreement dated January 22, 2001, Ninyo & Moore has performed a Phase I Environmental Site Assessment for the above-referenced property. The attached report presents our methodology, findings, conclusions, and recommendations regarding the environmental conditions at the site.

We appreciate the opportunity to be of service to the City of Lynwood. If you have any questions regarding this report, please contact the undersigned at your convenience.

Respectfully submitted,
NINYO & MOORE

Appendix B – Pertinent Site Information

Appendix C – Environmental Database Report

1. INTRODUCTION

The City of Lynwood authorized Ninyo & Moore to perform a Phase I Environmental Site Assessment (ESA) for a two-acre property that is currently vacant land located in the City of Lynwood, County of Los Angeles, California (site; Figure 1). Work was conducted in general accordance with the contract dated January 22, 2001 between the City of Lynwood and Ninyo & Moore.

The City of Lynwood obtained a Federal Environmental Protection Agency (EPA) Brownfields Site Assessment Demonstration Pilot Grant to identify and characterize potentially impacted properties in the city. As part of this investigation, the City of Lynwood has designated four properties for their Brownfields Revitalization Project. These properties were designated by the City as Site Nos. 1 through 4. As an initial task, Ninyo & Moore has been retained to complete Phase I ESAs for two of these properties; referred to by the City as Site No. 1 and Site No. 3. This report summarizes the results of the Phase I ESA for Site No. 3. The results for the Phase I ESA of Site No. 1 are presented in a separate report

The purpose of this Phase I ESA was to evaluate whether Recognized Environmental Conditions (RECs), as defined in the American Society for Testing and Materials (ASTM) Standard E 1527-97, are present due to past or present land use of the site, and/or properties in the site vicinity.

2. SITE DESCRIPTION

This section provides a description and current uses of the site and adjoining properties. Photographs of the site are included in Appendix A.

2.1. Site Location

The site is an irregular shaped two-acre parcel of vacant land that is located between Esther Street and State Street in the City of Lynwood, California (Figure 2). The site is bounded by single-family residences to the north; vacant land and a parking lot for a commercial freight truck facility to the south; State Street to the east; and vacant land to the west (Figure 2). Site

boundary information was obtained during a site reconnaissance by Ninyo & Moore and from a site plan provided the City of Lynwood. A copy of the site plan provided by the City is presented in Appendix B.

2.2. Site Characteristics

The site is undeveloped vacant land with scattered debris and refuse. A dirt road traverses the site from State Street to Esther Street. Debris noted on the site included municipal wastes such as mattresses and trash; green wastes such as grass cuttings and tree branches; and possible hazardous wastes such as 5-gallon buckets of roofing mastic and paints, and smaller containers of waste oil and paint thinner. Some on-site vegetation appeared distressed, possibly due to dumping activities. No evidence of underground storage tanks (USTs), 55-gallon drums, clarifiers, surfical staining, or groundwater monitoring wells was observed.

2.3. Vicinity Characteristics

Photographic documentation of portions of the site vicinity is included in Appendix A. The site vicinity consists of the following:

- North – Single-family residences.
- South – Vacant land and a parking lot associated with a commercial freight trucking facility (USF Bestway) that is located farther south of the site.
- West – Vacant land and a furniture manufacturing facility (Michel's & Company Furniture Manufacturing) beyond.
- East – State Street with single-family residences beyond.

3. SITE AND VICINITY RECONNAISSANCE

On January 17, 2001, a representative of Ninyo & Moore conducted a site and site vicinity reconnaissance. The reconnaissance involved a walking tour of the site and visual observations of the site and adjoining properties.

3.1. On-Site Polychlorinated Biphenyls (PCBs)

No potential sources of PCBs were observed at the site.

3.2. On-Site Hazardous Substances

Small quantities of possible hazardous substances were noted sparsely dumped on the site. Approximately ten 5-gallon buckets of roof mastic and paint and several quart- and pint-size containers of motor oil and paint thinner were noted on site. No other hazardous substances were observed at the site.

3.3. On-Site Hazardous Waste Disposal

No evidence of historical on-site hazardous waste disposal activities was observed during our site reconnaissance, although, as stated above, small quantities of possible hazardous wastes have been recently dumped on the site. Some distressed vegetation was also noted at the site which might suggest the possible disposal of hazardous materials.

3.4. On-Site Aboveground/Underground Storage Tanks

No aboveground storage tanks (ASTs) or USTs were observed on-site.

3.5. On-Site Pits, Sumps, Drywells, or Catchbasins

No pits, sumps, drywells, or catchbasins were observed on-site.

3.6. On-Site Asbestos-Containing Building Materials (ACBMs)

No buildings were located on-site and, therefore, no ACBMs are suspected to be present.

3.7. Potential Off-Site Issues

No potential off-site issues were observed during our site reconnaissance.

4. GENERAL GROUNDWATER AND SOIL CONDITIONS

The site lies within the Los Angeles Basin that is comprised of a thick alluvial deposit derived from the surrounding mountain ranges. According to the Los Angeles Department of Public Works (LADPW), Hydrologic Records Division, the nearest public well to the site is well number 1487B, located approximately 0.25 mile northwest of the site. On December 5, 2000, groundwater was measured at approximately 139 feet below ground surface (bgs) in this well. Based on our experience, perched groundwater may be encountered in the site vicinity at depths of approximately 25 feet bgs. Local groundwater is expected to flow to the south following the surface topography.

5. SITE AND VICINITY HISTORY

This section describes historical use information regarding the site and adjoining properties compiled from several resources. Current and past uses of the site and adjoining properties are discussed.

In summary, the site has been vacant land since at least 1938 through the time of this report. The property east of the site and beyond State Street has been vacant land from at least 1938 through approximately 1952 when this property was developed with the existing single-family residences. The property north of the site was vacant from at least 1938 through approximately 1972. At this time the existing single-family residences were constructed.

The property west of the site was vacant land from at least 1938 through approximately 1963 when the existing Michel's & Company Furniture Manufacturing building was constructed. The vacant land and portions of the property occupied by USF Bestway was vacant from at least 1938 through 1981. This property was used as a landfill from at least 1949 through 1952. The extent and contents of the landfill are unknown. The USF Bestway building was constructed in approximately 1981.

5.1. Aerial Photographs

Aerial photographs were provided by Rupp Aerial Photography, Inc., of Corona, California. Aerial photographs were reviewed covering years 1938, 1952, 1963, 1972, 1985, and 1992. The aerial photographs that were reviewed for the site and vicinity were taken at high altitudes with very large scales. Based on this information and due to the small size of the site, observations of site features were difficult to review.

In the 1938 aerial photograph, the site and site vicinity appeared to be vacant. Most of the surrounding streets were observed on this photograph.

In the 1952 and 1963 aerial photograph, the site appeared to be vacant. Adjacent property to the north and west also appeared to be vacant. The property east of the site appeared to be occupied by the existing single-family residences. A topographically depressed area was noted immediately south of the site (in the location currently occupied by USF Bestway and vacant land, see Figure 2). According to a regulatory database, a landfill had occupied the property during this time frame. The extent of the possible landfill activities may have extended on the southern portion of the site. Due to the high altitude and large scale of the photograph, these assumptions could not be verified. Nearby landfill activity is further discussed in section 8.1.8. By 1963, the land previously showing the landfill appeared to have been graded.

In the 1972 aerial photograph, the site appeared to be vacant. Some of the residential properties currently existing north of the site were observed on this photograph. The properties east and south of the site appeared to be vacant, with no landfill activities noted on the southern property. The remaining site vicinity appeared similar to the 1963 photograph.

In the 1985 and 1992 aerial photographs, the site and site vicinity appeared similar to that observed during the site reconnaissance.

5.2. Historical Topographical Maps

Ninyo & Moore obtained historical topographical maps from Environmental Data Resources, Inc. (EDR) dated 1899, 1942, 1949, and 1964 with photorevisions in 1972 and 1981. Copies of the topographic maps are provided in Appendix B. The following summarizes a review of these maps.

1899 – The site appeared to be vacant land with no structures shown on the map. A small stream was shown oriented through the site.

1942 – The site was shown in an urban area. The surrounding streets, such as State Street, Weber Street, and Esther Street, are shown on this map.

1949 – The site and immediate site vicinity was located within an urbanized area. No structures were shown on the site or in the immediate site vicinity. A topographical depression (possibly the location of the historical landfill) was shown on the property immediately south of the site.

1964 – The site and immediate site vicinity was again shown in an urbanized area. There was no topographical depression shown on the property immediately south of the site. The buildings currently occupied by Michel's & Company were noted west of the site. The 1981 photorevision showed the additions to the buildings currently occupied by Michel's & Company.

5.3. Sanborn Fire Insurance Maps

Ninyo & Moore retained VISTA Information Solutions, Inc. (VISTA) to obtain Sanborn Fire Insurance Maps (Sanborn) covering the site and vicinity. According to VISTA, Sanborn maps were not available for the site or site vicinity.

5.4. Oil and Gas Maps

According to the Regional Wildcat Map W1-5, supplied by the State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), the site

and immediate vicinity does not lie in an active oil field. There are no active or abandoned oil or gas wells on or adjacent to the site.

5.5. Building Permits

Ninyo & Moore requested building permit information from the City of Lynwood Building Department (LBD). According to the LBD, the site comprises parcel 6169-016-900 which was issued an address of 11828 Esther Street; a portion of parcel 6169-016-901 which was issued an address of 11901 State Street; a portion of parcel 6169-016-013 which was issued an address of 11817 State Street; and a portion of parcel 6169-016-005 which was issued an address of 11810 Esther Street. Based on our site reconnaissance, the addresses of 11810 Esther Street and 11817 State Street were used by the off-site residences located north of the site. Based on this information, it appears that only two addresses were issued to the site. According to the LBD, no files exist for the site addresses.

5.6. City Directories

Ninyo & Moore requested to review records at the Haines Criss-Cross Directory in Fullerton, California. Selected years of city directories from 1959, 1967, 1971, 1975, 1980, 1985, 1990, 1995, and 2000 were reviewed for the site and properties immediately adjacent to the site. The addresses associated with the site were not listed in the city directories reviewed. The site vicinity appeared to have been used for residential and/or commercial properties from at least 1959 through the present. Copies of these city directories are provided in Appendix B.

6. PREVIOUS REPORTS REVIEWED

Ninyo & Moore was not supplied with previous investigations and/or environmental reports regarding the site from the City of Lynwood or other sources.

7. ENVIRONMENTAL REGULATORY AGENCY INQUIRIES

7.1. Los Angeles County Department of Public Works, Environmental Programs Division (DPW)

Ninyo & Moore requested information from the Los Angeles County Department of Public Works (DPW). According to the DWP, no files exist for the site addresses.

7.2. County of Los Angeles Department of Health Services (DHS)

Ninyo & Moore requested information from the County of Los Angeles Department of Health Services (DHS). According to the DHS, no files exist for the site addresses regarding hazardous material storage, handling, or use.

7.3. Regional Water Quality Control Board-Los Angeles Region (RWQCB)

Ninyo & Moore requested information from the RWQCB regarding the site. According to the RWQCB, no files exist for the site addresses.

8. REGULATORY RECORDS REVIEW

The following sections include the results and a discussion of the computerized search of state and federal standard environmental databases.

8.1. Mapped Database Records Search

A computerized, environmental database search was performed for Ninyo & Moore by VISTA. The VISTA search included federal, state, and local databases. A complete description of the assumptions and approach to the database search, as well as the results, is provided in Appendix C. The review was conducted to evaluate whether the site or properties within the vicinity of the site have been identified as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. The facilities discussed below were found to either be located on-site,

immediately adjacent to the site, up-gradient from the site and/or possibly pose an environmental concern to the site. No unmapped sites were identified within the searched radii.

8.1.1. National Priorities List (NPL): Distance Searched – 1.0 mile

The NPL is the Environmental Protection Agency's (EPA) database of uncontrolled or abandoned hazardous waste properties identified for priority remedial actions under the Superfund program.

Neither the site nor properties located within a 1.0-mile radius of the site were listed on this database.

8.1.2. Corrective Action Report (CORRACTS): Distance Searched – 1.0 mile

The EPA maintains this database of RCRA facilities that are undergoing corrective action. A corrective action order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.

The site was not listed on this database. Four listings representing three facilities were noted on this database within a 1.0-mile radius from the site. According to VISTA, the facilities were located between approximately 0.23 mile and 0.77 mile cross- to down-gradient from the site. Based on the distance and direction of these facilities from the site, these facilities would not be considered an environmental concern to the site.

8.1.3. State Equivalent Priority List (SPL): Distance Searched – 1.0 mile

The Calsites database is maintained by the California Environmental Protection Agency (Cal-EPA), Department of Toxic Substances Control (DTSC). This database contains information on Annual Workplan Sites, and both known and potentially contaminated properties. Two-thirds of these properties have been classified, based on available information, as needing "No Further Action" (NFA) by the DTSC. The remaining properties are in various stages of review and remediation to determine if a problem exists.

Neither the site nor properties located within a 1.0-mile radius of the site were listed on this database.

8.1.4. Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List and No Further Action Planned Report (NFRAP): Distance Searched – 0.5 mile

The CERCLIS database contains properties which are either proposed or on the NPL and properties which are in the screening and assessment phase for possible inclusion on the NPL. The NFRAP database contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS database.

The site was not listed on this database. Five facilities were located within a 0.5-mile radius of the site. According to VISTA, these facilities were located greater than approximately 0.23 mile from the site and were cross- to downgradient to the site. The facilities had regulatory status of NFRAP. Based on the distance and direction of these facilities from the site and regulatory status, these facilities are not considered an environmental concern to the site.

8.1.5. State Equivalent CERCLIS List (Calsites): Distance Searched – 0.5 mile

This database is provided by the DTSC and includes potential or confirmed hazardous substance release properties. In 1996, the California EPA reevaluated and significantly reduced the number of sites in the CalSites Database.

The site was not listed. Five facilities were located within a 0.5-mile radius of the site. According to VISTA, these facilities were located greater than approximately 0.23 mile from the site and were cross- to downgradient to the site. Based on the distance and direction of these facilities from the site, these facilities are not considered an environmental concern to the site.

8.1.6. Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities List: Distance Searched – 0.5 mile

The RCRA TSD database is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste.

Neither the site nor properties located within a 0.5-mile radius of the site were listed on this database.

8.1.7. State Leaking Underground Storage Tank (LUST) Lists: Distance Searched – 0.5 mile

Databases of the Leaking Underground Storage Tank (LUST) information system are maintained by the Cal-EPA and the Regional Water Quality Control Board (RWQCB).

The site was not listed on this database. Fourteen facilities located within a 0.5-mile radius from the site were listed on this database. According to VISTA, twelve of the fourteen facilities are located between 0.16 mile and 0.5 mile from the site, are located in a cross- to downgradient direction, and/or have a regulatory status of “closed case.” Based on the distance and direction of these facilities from the site, and/or regulatory status, these facilities are not considered an environmental concern to the site.

Two facilities are less than 0.16 mile from the site. The nearest facility to the site is USF Bestway located immediately south of and downgradient from the site. According to VISTA, a release of gasoline had occurred that affected soil only. This facility is currently considered a closed case with regulatory agencies. Filbar Furniture Manufacturing Company, Inc. at 2828 Butler Avenue (currently occupied by Michel's & Company Furniture Manufacturing) was located approximately 500 feet west of and crossgradient from the site. Ninyo & Moore reviewed the DPW file for this property. During the removal of USTs at this property in 1998, a release of gasoline was detected which affected groundwater. Based on the laboratory results, the extent of impacted soil and groundwater has not yet been fully assessed. Although further investigations and/or remediation will likely be conducted at this property, there is a low likelihood, based on

our review, and distance of the property from the site, that this release will affect the site. Based on the distance and direction of these facilities from the site, and/or regulatory status, these facilities are not considered an environmental concern to the site.

8.1.8. Solid Waste Landfill Sites (SWIS): Distance Searched – 0.5 mile

The SWIS database consists of open and closed solid waste disposal facilities and transfer stations. The data come from the Integrated Waste Management Board's Solid Waste Information System database.

The site was not listed on this database. Two facilities located within a 0.5-mile radius from the site were listed on this database. Weber Avenue Dump (also listed as Weber Avenue-Compton) is located at 575 East Weber Avenue, immediately south of and downgradient from the site; and Leslie Cantrell at 11901 South Alameda located approximately 0.24 mile west of and crossgradient from the site. Ninyo & Moore contacted the RWQCB and the DHS regarding information about the landfills. The RWQCB indicated that no files were available for either landfill property. DHS indicated that the agency does not consider the facility to be a landfill property.

According to VISTA, the Weber Avenue Dump was listed on regulatory databases as a solid waste disposal site. As previously mentioned, historical aerial photographs and topographical maps indicated a topographical depression and possible landfill activities immediately south of the site in the current location of the vacant land and eastern portion of the USF Bestway property. Due to the large scale of these sources, the landfill may have been partially located on the southern portion of the site. According to Mr. Stan Urehara of the DHS, very limited information was provided in the DHS file. Mr. Urehara indicated TNT Bestway Transportation Incorporated (previous owners of the property) acquired the property in approximately 1981 and conducted "subsurface analysis." According to a hand-written note in the file, inert materials including pieces of concrete and asphalt were discovered. There was no indication in the file that would suggest that soil samples were collected for chemical analyses. Based on the proximity

of this landfill, there is a high likelihood that the historical use of this property may have environmentally impacted the site.

According to Mr. Urehara very limited information was available in the DHS file regarding the Leslie Cantrell property. The DHS does not consider this property to be a former landfill. Based on the distance, direction, and regulatory status of this facility, this facility is not considered an environmental concern to the site.

8.1.9. State Index of Properties with Hazardous Waste – CORTESE List: Distance Searched – 0.5 mile

The CORTESE database is provided by the Office of Environmental Protection, Office of Hazardous Materials and is a state index that identifies potential and confirmed hazardous waste sites throughout California.

The site was not listed on this database. Seven facilities located within a 0.5-mile radius of the site were listed on this database due to their listing as LUST cases.

8.1.10. Toxic Pits Cleanup Facilities: Distance Searched – 0.5 mile

The Toxic Pits database is maintained by the Water Quality Control Board, Division of Loans and Grants.

Neither the site nor properties located within a 0.5-mile radius of the site were listed on this database.

8.1.11. Toxic Release Inventory Database (TRIS): Distance Searched – 0.25 mile

The Community Right to Know Act (SARA Title III) required the EPA to establish this inventory of toxic chemical emissions from certain facilities.

The site was not listed on this database. Four facilities located within a 0.25-mile radius from the site were listed on this database. Inclusion on this database is indicative of authorized releases to the air. The nearest facility to the site was listed as Michel's & Company Furniture Manufacturing located approximately 500 feet west of the site. This

facility was listed as having authorized releases of methyl ethyl ketone (MEK). Based on the distance and direction of these facilities from the site, and media affected, these facilities are not considered an environmental concern to the site.

8.1.12. Underground Storage Tank (UST) and Aboveground Storage Tank (AST)

Registration List: Distance Searched – Site and Adjoining Properties

UST and AST databases are provided by the State Water Resources Control Board (SWRCB). Inclusion on these lists is for permitting purposes and is not indicative of a release.

The site was not listed on this database. Adjacent facilities listed as having permitted USTs included USF Bestway, located immediately south of the site, and Filbar Furniture Manufacturing Company Incorporated (currently Michel's & Company Furniture Manufacturing) located 500 feet west of the site.

8.1.13. RCRA Generators List: Distance Searched – Site and Adjoining Properties

This list identifies sites that generate hazardous waste as defined by RCRA. Inclusion on these lists is for permitting purposes and is not indicative of a release.

The site was not listed. One adjoining property, USF Bestway, is listed as a small generator of hazardous waste.

9. DISCUSSION AND CONCLUSIONS

Based on the results of this study as described herein, the following discussion and conclusions regarding the site is presented:

- The site has been vacant since at least 1938 through the time of this report. The site vicinity has been used for residential and commercial purposes since at least the 1950s.
- During the site reconnaissance, small quantities of possible hazardous wastes (i.e., paint, waste oil, paint thinner, and roofing mastic) were noted in containers that had been dumped

on the site. Some distressed vegetation was also observed. These materials and distressed areas would be considered a REC.

- The Weber Avenue Dump is reported to be located immediately south of the site. Very limited information regarding this landfill was provided during the investigation by regulatory agencies. According to this information, inert material consisting of concrete and asphalt was discovered during development of the UFS Bestway property in 1981. There was no indication that soil samples were collected for chemical analyses. Based on our review of historical aerial photographs and topographic maps, portions of this landfill may have been located on the southern portion of the site. Based on the lack of information regarding the extent and content of the landfill, there is a likelihood that the landfill may have had a significant environmental impact on the site. These former activities would be considered a REC.

Except for the historical landfill and possible wastes that were dumped at the site, it is unlikely, in our opinion, that there are significant adverse environmental conditions resulting from current and/or past activities at the site and in the site vicinity, and it is our judgment that these activities would not constitute a REC.

10. RECOMMENDATIONS

Based on the results of this assessment, Ninyo & Moore has the following recommendations:

- A Phase II subsurface investigation should be conducted at the site to further assess whether the historical landfill may have environmentally impacted the site. The subsurface investigation should include collecting and analyzing discrete soil and/or groundwater samples, and conducting a methane gas survey.
- The containers containing possible hazardous wastes that have been dumped on the site should be properly removed in accordance with regulatory guidelines. A fence should be placed around the site to discourage future dumping activities. A subsurface investigation should be conducted in the areas of distressed vegetation to assess whether impacted soil is present.

11. LIMITATIONS AND EXCEPTIONS OF THE ASSESSMENT

The opinions and recommendations presented in this report are based upon the results of a site reconnaissance and a review of available background information. The scope of this evaluation did not include subsurface exploration, soil or water sampling, or chemical analysis, or an evaluation of radon, lead, or asbestos. The scope of this evaluation did not include an evaluation

of geotechnical conditions and/or hazards. Properties surrounding the site were visually inspected from public rights-of-way. Our observations were made from readily accessible vantage points. Although a reasonable effort was made to view relevant site features, some features may have been concealed. Further assessment of possible adverse environmental impacts from past on-site activities and activities on surrounding facilities may be accomplished by a more comprehensive assessment, which would likely include excavation of on-site soil borings, soil sampling and analysis, installation of groundwater monitoring wells, lead-based paint testing, and asbestos testing.

The opinions presented herein apply to site conditions existing at the time of our Phase I Environmental Site Assessment, and cannot be taken to apply to site changes or conditions of which we are not aware and/or have not had the opportunity to evaluate.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information, or has questions regarding project information, or the content, interpretations presented, or completeness of this document.

Opinions and judgments expressed herein, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions. In the event conditions change from those described in this Phase I Environmental Site Assessment, Ninyo & Moore reserves the right to review such conditions and to modify, as appropriate, the assessments and conclusions provided in this report.

SITE ASSESSMENT PLUS REPORT

DESCRIPTION OF DATABASES SEARCHED

A) DATABASES SEARCHED TO 1 MILE

- NPL**
SRC#: 19 VISTA conducts a database search to identify all sites within 1 mile of your property.
The agency release date for National Priorities List was August, 2000.
- The NPL Report is the US EPA's registry of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980.
- SPL**
SRC#: 113 VISTA conducts a database search to identify all sites within 1 mile of your property.
The agency release date for CalSites Database was October, 2000.
- This database is provided by the Cal. Environmental Protection Agency, Dept. of Toxic Substances Control. The agency may be contacted at: 916-323-3400.
- CORRACTS**
SRC#: 14 VISTA conducts a database search to identify all sites within 1 mile of your property.
The agency release date for RCRIS Corrective Action Sites was June, 2000.
- The CORRACTS database contains information concerning RCRA facilities that have conducted, or are currently conducting a corrective action. A Corrective Action Order is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may also be imposed as a requirement of receiving and maintaining a TSDF permit.
- RCRIS-TSDC**
SRC#: 556 VISTA conducts a database search to identify all sites within 1 mile of your property.
The agency release date for RCRIS TSDs Subject to Corrective Action was June, 2000.
- The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDCs are treatment, storage and/or disposal facilities that are subject to corrective action under RCRA.

For more information call VISTA Information Solutions, Inc. at **1 - 800 - 767 - 0403**.

Report ID: **107901901**

Version 2.7

Date of Report: **January 29, 2001**

Page #80

B) DATABASES SEARCHED TO 1/2 MILE

- CERCLIS**
SRC#: 17 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Comprehensive Environmental Response, Compensation and Liability Information Sys was August, 2000.
- The CERCLIS database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the U.S. EPA for the release, or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation, and ultimately placed on the National Priorities List (NPL).
- NFRAP**
SRC#: 18 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for No Further Remedial Action Planned was August, 2000.
- The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, either no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration.
- SCL**
SRC#: 112 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for CalSites Database was October, 2000.
- This database is provided by the Department of Toxic Substances Control. Two- thirds of these sites have been classified, based on available information, as needing "No Further Action" (NFA) by the Department of Toxic Substances Control. The remaining sites are in various stages of review and remediation to determine if a problem exists at the site. Several hundred sites have been remediated and are considered certified. Some of these sites may be in long term operation and maintenance
- RCRIS-TSD**
SRC#: 12 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for RCRIS Treatment, Storage and Disposal Facilities was June, 2000.
- The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDs are facilities which treat, store and/or dispose of hazardous waste.
- SWLF**
SRC#: 23 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for USGS Solid Waste Landfills was December, 1991.
- This database is provided by the United States Geological Survey. The agency may be contacted at: 703-648-5613.

- SWLF**
SRC#: 163 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Solid Waste Inventory System was October, 2000.
- This database is provided by the Integrated Waste Management Board. The agency may be contacted at: 916-255-4021.
- SWLF-CO**
SRC#: 51 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Los Angeles County Soild Waste Landfills Transfer Stations was February, 1998.
- This database is provided by the Public Health Invesigtations, Hazardous Material Control Program. The agency may be contacted at: 323-881-4151.
- SWLF-CO**
SRC#: 70 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for City of Los Angeles Landfills Transfer Stations was April, 1999.
- This database is provided by the City of Los Angeles, Environmental Affairs Department. The agency may be contacted at: 213-580-1070.
- WMUDS**
SRC#: 68 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Waste Management Unit Data System was February, 1999.
- This database is provided by the State Water Resources Control Board. The agency may be contacted at: 530-892-0323. This is used for program tracking and inventory of waste management units. This system contains information from: Facility, Waste Management Unit, SWAT Program and Report Summary Information, Chapter 15 (formerly Subchapter 15), TPCA and RCRA Program Information, Closure Information; also some information from the WDS (Waste Discharge System).
- SPILLS**
SRC#: 107 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Region 4 SLIC Site List was April, 2000.
- This database is provided by the Regional Water Quality Control Board, Region #4. The agency may be contacted at: 323-266-7576.
- LUST**
SRC#: 164 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Leaking Underground Storage Tank Information System was October, 2000.
- This database is provided by the California Environmental Protection Agency. The agency may be contacted at: 916-341-5740.

LUST-REG
SRC#: 108 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Region 6 Leaking Underground Storage Tanks was February, 2000.

This database is provided by the Lahontan Region Six South Lake Tahoe. The agency may be contacted at: 530-542-5400

LUST-REG
SRC#: 121 VISTA conducts a database search to identify all sites within 1/2 mile of your property
The agency release date for Region 4 Leaking Underground Storage Tank was February, 2000.

This database is provided by the Regional Water Quality Control Board, Region #4. The agency may be contacted at: 323-266-7582.

LUST-REG
SRC#: 128 VISTA conducts a database search to identify all sites within 1/2 mile of your property
The agency release date for Region 6 Leaking Underground Storage Tanks was February, 2000.

This database is provided by the Regional Water Quality Control Board, Region #6. The agency may be contacted at: 760-241-7365.

CORTESE
SRC#: 53 VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Cortese List - Hazardous Waste Substance Site List was April, 1998.

This database is provided by the Office of Environmental Protection, Office of Hazardous Materials. The agency may be contacted at: 916-445-6532. The California Governor's Office of Planning and Research annually publishes a listing of potential and confirmed hazardous waste sites throughout the State of California under Government Code Section 65962.5. This database (CORTESE) is based on input from the following:
(1)CALSITES-Department of Toxic Substances Control, Abandoned Sites Program Information Systems; (2)SARA Title III Section III Toxic Chemicals Release Inventory for 1987, 1988, 1989, and 1990; (3)FINDS; (4)HWIS-Department of Toxic Substances Control, Hazardous Waste Information System. Vista has not included one time generator facilities from Cortese in our database ; (5)SWRCB-State Water Resources Control Board; (6)SWIS-Integrated Waste Management Control Board (solid waste facilities); (7)AGT25-Air Resources Board, dischargers of greater than 25 tons of criteria pollutants to the air; (8)A1025-Air Resources Board, dischargers of greater than 10 and less than 25 tons of criteria pollutants to the air; (9)LTANK-SWRCB Leaking Underground Storage Tanks; (10)UTANK-SWRCB Underground tanks reported to the SWEPS systems; (11)IUR-Inventory Update Rule (Chemical Manufacturers); (12)WB-LF- Waste Board - Leaking Facility, site has known migration; (13)WDSE-Waste Discharge System - Enforcement Action; (14)DTSCD-Department of Toxic Substance Control Docket.

BORDER-ZON VISTA conducts a database search to identify all sites within 1/2 mile of your property
SRC#: 46 **The agency release date for Deed Restriction Properties Report was April, 1994.**

The Deeds Restrictions list, also known as the Border Zone Property List, contains information concerning voluntary deed restriction. These agreements are made with owners of property who propose building residences, schools, hospitals, or day care centers on property that is on or within 2,000 feet of potentially hazardous waste site.

TOXICPITS VISTA conducts a database search to identify all sites within 1/2 mile of your property.
SRC#: 49 **The agency release date for Toxic Pits was February, 1995.**

This database is provided by the Water Quality Control Board, Division of Loans Grants. The agency may be contacted at: 916-227-4396

USGS-WELLS VISTA conducts a database search to identify all sites within 1/2 mile of your property.
SRC#: 3 **The agency release date for USGS Water Wells was March, 1998.**

The Ground Water Site Inventory (GWSI) database was provided by the United States Geological Survey (USGS). The database contains information for over 1,000,000 wells and other sources of groundwater which the USGS has studied, used or documented during research.

C) DATABASES SEARCHED TO 1/4 MILE

RCRIS-VIOL VISTA conducts a database search to identify all sites within 1/4 mile of your property.
SRC#: 11 **The agency release date for RCRIS Facilities with Violations was June, 2000.**

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. The RCRIS Other report contains information concerning facilities that are "unclassified" within the RCRIS database (not classified as a Large Quantity Generator, Transporter, etc.).

UST VISTA conducts a database search to identify all sites within 1/4 mile of your property.
SRC#: 45 **The agency release date for Underground Storage Tanks was January, 1994.**

This historical database is provided by the State Water Resources Control Board, Office of Underground Storage Tanks. Please refer to the local level UST list for more current information. Be advised that some states do not require registration of heating oil tanks, especially those used for residential purposes

- UST-CO-LB**
SRC#: 56 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for City of Long Beach Underground Storage Tanks was October, 1999.
- This database is provided by the City of Long Beach Fire Department. The agency may be contacted at: 562-570-2560. Be advised: Many states do not require registration of heating oil tanks, especially those used for residential purposes.
- UST-ELSE**
SRC#: 86 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for City of El Segundo Underground Storage Tanks was August, 2000.
- This database is provided by the City of El Segundo Fire Department. The agency may be contacted at: 310-607-2239. Be advised: Many states do not require registration of heating oil tanks, especially those used for residential purposes.
- UST-TORR**
SRC#: 101 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for City of Torrance Underground Storage Tanks was April, 2000.
- This database is provided by the City of Torrance Fire Prevention Division. The agency may be contacted at: 310-618-2973. Be advised: Many states do not require registration of heating oil tanks, especially those used for residential purposes.
- UST-CO-LA**
SRC#: 142 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Los Angeles County UST Street Number Book was November, 2000.
- This database is provided by the Los Angeles County Department of Public Works, Environmental Programs. The agency may be contacted at: 626-458-4125. Be advised: Many states do not require registration of heating oil tanks, especially those used for residential purposes
- AST**
SRC#: 60 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Aboveground Storage Tanks was December, 1999.
- This database is provided by the State Water Resources Control Board. The agency may be contacted at: 916-227-4364.
- LACO-SITE-**
SRC#: 111 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Los Angeles County Site Mitigation Complaint Control Log was August, 1999.
- This database is provided by the Department of Health Services, LA County Public Health Investigations. The agency may be contacted at: 323-890-7806.

TRIS
SRC#: 2 VISTA conducts a database search to identify all sites within 1/4 mile of your property.
The agency release date for Toxic Release Inventory System was January, 1998.

All facilities that manufacture, process, or import toxic chemicals in quantities in excess of 25,000 pounds per year are required to register with the EPA under Section 313 of the Superfund Amendments and Reauthorization Act (SARA Title III) of 1986. Data contained in the TRIS system covers approximately 20,000 sites and 75,000 chemical releases.

D) DATABASES SEARCHED TO 1/8 MILE

ERNS
SRC#: 8 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for Emergency Response Notification System was December, 1999.

ERNS is a national computer database system that is used to store information on the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS reporting system contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party.

RCRA-LQG
SRC#: 16 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for RCRIS Large Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Large Generators are facilities which generate at least 1000 kg./month of non-acutely hazardous waste (or 1 kg./month of acutely hazardous waste).

RCRIS-SQG
SRC#: 15 VISTA conducts a database search to identify all sites within 1/8 mile of your property.
The agency release date for RCRIS Small Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Small Quantity Generators are facilities which generate less than 1000 kg./month of non-acutely hazardous waste.

End of Report
